

Noble Corporation plc & Subsidiaries - Fleet Status Report Summary

Noble Corporation plc released a Fleet Status Report on **September 4, 2018**.

A copy of the report is attached to this note and available in PDF and Excel formats on our website: www.noblecorp.com.

The Company will continue to report planned periods of downtime of 14 days or more by rig covering regulatory inspections and upgrade projects.

Timing and length of planned shipyard stays are subject to, among other things, changes in Noble's and its customers' schedule(s).

This summary is provided as a courtesy and is not intended to replace a detailed review of the Fleet Status Report.

You are urged to review the Fleet Status Report in detail.

New Contracts / Extensions / Modifications / Letters of Intent	Operational Downtime Summary
<p><u>South America</u> <i>Noble Tom Madden</i>: Mid October 2018 to Mid December 2018.</p>	

The Company anticipates issuing its next Fleet Status Report on: **Thursday, October 11, 2018**.

This fleet status report contains information on contracts and letters of intent or awards with our customers. Letters of intent or awards are noted in the comments section and may not result in an actual drilling contract. The information contained in this fleet status report is as of the date of the report only and is subject to change without notice to the recipient, and we assume no duty to update any portion of the information contained herein. This fleet status report contains statements that are not historical facts, which are "forward-looking statements" within the meaning of the U.S. federal securities laws. Forward-looking statements include, but are not limited to, statements about estimated duration of client contracts, contract dayrate amounts, future contract commencement dates, shipyard projects, our business, financial performance and prospects. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we cannot assure you that such expectations will prove to have been correct. Various factors could cause actual results to differ materially.

Full Contract Dayrate reflects the full daywork operating rate payable to the Company by the operator as provided in the applicable drilling contract unless otherwise specified. The average dayrate over the term of the contract will be lower and could be substantially lower. The actual average dayrate will depend upon a number of factors (rig downtime, suspension of operations, foreign exchange currency movements, etc.) including some beyond our control. Our client contracts and operations are generally subject to a number of risks and uncertainties. Under our drilling contracts, our clients have termination rights, which may be exercised under various circumstances. These rights relate to, among other conditions, equipment breakdown, failure to meet delivery windows, and equipment and specification failures. In very limited cases, our clients have termination rights with no or minimal notice and financial penalties. We discuss these factors, including risks, uncertainties and assumptions concerning actions by our clients, governments and other third parties, drilling activity levels, market conditions, operational difficulties, weather related events and other matters, from time to time in our filings with the U.S. Securities and Exchange Commission ("SEC"), which we urge you to review and which are available free of charge on the SEC's Website at www.sec.gov.
